Step 1: Project Identity

PROJECT TITLE

Void Office Tycoon

COURSE CODE

COM0463

DOMAIN

IT project management

DELIVERABLE AREA

Step 2: Problem & Population

PROBLEM STATEMENT

In COM0463, some students know project terms but do not see how they connect. Scope, budget, team work, and quality can feel separate. This game makes them visible as office parts inside a void and targets about 15% better post-quiz results.

TARGET POPULATION

Around 40 COM0463 IT Project Management students.

SUCCESS CRITERIA

- At least 75% of students explain one good department choice.
- At least 30 students play one full office run.
- Each student finishes one minigame and buys one department.
- Post-quiz results improve by about 15%.

ORGANISATION

Istanbul Kultur University

TEAM MEMBERS

name	surname	email	role
Ahmet Deniz	Sezgin	2300005633@stu.iku.edu.tr	Project lead
Kerem	Yılmaz	2100003979@stu.iku.edu.tr	Risk content
Okay	Aşçı	1900004115@stu.iku.edu.tr	Developer and tester

PROPOSAL DATE

Step 3: Scope & Requirements

USER STORIES

id	role	want	soThat	acc
US-		to play short project	I can earn	Given a minigame starts, When I finish it,

01	Student	minigames	points for my office.	Then I receive main points and one resource result.
US-02	Student	to buy strange office departments	my office can grow in the void.	Given I have enough points, When I buy a department, Then it appears on the office map.
US-03	Student	to choose between Budget, Team, and Quality upgrades	I can plan my project strategy.	Given I choose a department, When it is built, Then one resource increases more than the others.
US-04	Instructor	to see the final office report	I can discuss student decisions in class.	Given the game is finished, When I open the report, Then I can see departments, resources, and key choices.
US-05	Facilitator	to pause the game for explanation	confused students can follow the activity.	Given students are confused, When I pause the session, Then the current office state stays visible.

FUNCTIONAL REQUIREMENTS

id	description
FR-01	System shall show a void office map with locked and built departments.
FR-02	System shall run short timed minigames and give points.
FR-03	System shall keep a simple log with studentId, minigameId, departmentBuilt, resourceChange, timestamp, and final result.

NON-FUNCTIONAL REQUIREMENTS

id	attr	desc	target
NFR-01	Performance	The game should not feel slow.	Most actions under 1 second
NFR-02	Usability	Students should understand the office screen easily.	Short tutorial before play
NFR-03	Privacy	Student data should not be shared publicly.	Use simple class IDs instead of public names
NFR-04	Accessibility	Text, timers, and buttons should be easy to read.	Clear labels and readable contrast
NFR-05	Reliability	The game should keep progress during the class.	Save choices after each minigame

LOG PRIVACY STATEMENT

The game keeps a simple log of choices, scores, and built departments. The log is only for class feedback.

DATA COLLECTION PLAN

I will use quiz results, game logs, and a short reflection about the final office.

Step 4: Theoretical Framework

BLOOM OUTCOMES

level	bloom_k	outcome	activity	assessment
L1 Remember	1	Remember basic project terms like scope, budget, team, and quality.	Short quiz	Quiz answers
L2 Understand	2	Explain why Budget, Team, and Quality matter in a project.	Class discussion	Short answer
L3 Apply	3	Use points to buy a useful department in the office.	Office upgrade	Game result
L4 Analyse	4	Compare two department choices and explain the better one.	Game debrief	Reflection
L5 Evaluate	5	Judge if the office plan was balanced enough to escape.	Final discussion	Decision explanation
L6 Create	6	Create a short improved office expansion plan.	Final report	Expansion plan draft

THEORIES USED

- sdt
- mda
- bloom
- kirkpatrick

MDA ANALYSIS

- **mechanics:** Timed minigames, main points, Budget, Team, Quality, and department unlocks.
- **dynamics:** Students balance quick minigame results with slower office planning.
- **aesthetics:** The game should feel like a strange office slowly appearing in empty space.

HEXAD DISTRIBUTION (% SUMS TO 100)

- **Achiever:** 30
- **Socialiser:** 25
- **Player:** 20
- **FreeSpirit:** 15
- **Philanthropist:** 10
- **Disruptor:** 0

MECHANICS

- main points
- Budget resource
- Team resource
- Quality resource
- timed minigames
- department buying

Step 5: Motivational Design

SDT — AUTONOMY SUPPORT

Students choose which department to build and which resource to improve.

SDT — COMPETENCE SUPPORT

Students get quick feedback after each minigame, so they can improve the next office choice.

SDT — RELATEDNESS SUPPORT

Students compare office layouts and explain why their department order worked or failed.

OCTALYSIS (0.0-1.0 PER DRIVE)

- **epicMeaning:** 0.6
- **development:** 0.7
- **accomplishment:** 0.7
- **empowerment:** 0.6
- **ownership:** 0.6
- **social:** 0.5
- **scarcity:** 0.4
- **unpredictability:** 0.5
- **avoidance:** 0.2

Step 6: Narrative & Concept Mapping

NARRATIVE THEME

The player starts with one desk floating in a dark void. Fast project minigames create main points, Budget, Team, and Quality. Departments like Scope Desk, Bug Lab, Sprint Floor, Risk Vault, and Stakeholder Booth appear when the player spends points. The final Portal Room opens when the office is strong enough. Self-Determination Theory is used because students choose upgrades. Mechanics-Dynamics-Aesthetics connects minigames with the feeling of building the office. Bloom Taxonomy moves students from terms to planning. Kirkpatrick four-level evaluation is used with reaction, quiz, transfer, and result checks.

GAME OVERVIEW

The player builds an IT project office inside a void. Each round has a short arcade-style project minigame. Points buy departments. Budget, Team, and Quality change based on the player's department choices. When enough departments are built, the Portal Room opens and the office escapes.

CONCEPT-GAME MAPPINGS

concept	mechanic
Scope management	Scope Desk requirement sorting
Resource allocation	Budget, Team, and Quality choices
Quality management	Bug Lab triage minigame
Risk management	Risk Vault warning events
Stakeholder communication	Stakeholder Booth reply choices

Step 7: Session Flow & Scoring

SCENARIOS

id	title	setup	winCondition	loseCondition	outcome
SC-01	Scope Fog	Requirement notes float across the void and the timer starts.	The student sorts must-have and nice-to-have items correctly.	If items are mixed badly, losePoints=0 and office growth slows for debrief.	Students see why scope control protects Budget and Team.
		Bugs fall onto the	The student catches	If serious bugs are	Students see why testing

SC-02	Bug Rain	office floor during a release sprint.	serious bugs before minor bugs.	missed, losePoints=0 and Quality drops for discussion.	and quality choices matter.
SC-03	Budget Rift	A rift opens and offers three department upgrades with different costs.	The student chooses an upgrade that keeps Budget, Team, and Quality balanced.	If one resource becomes too weak, losePoints=0 and the class reviews the choice.	Students see how project trade-offs affect the final goal.

GAME DURATION

About 60 to 75 minutes including explanation, play, and debrief.

SESSION STEPS

seq	name	description	duration
1	Introduction	Instructor explains the office goal, resources, and minigames.	10 min
2	Play	Students play minigames and build departments.	40 min
3	Debrief	Class discusses office choices and project trade-offs.	15 min
4	Report	Students write a short improved office expansion plan.	10 min

Step 8: Social & Rewards

REWARD STRUCTURE

- **elite:** Students who open the Portal Room get an Escape Architect badge.
- **professional:** Students who build three departments get a Department Builder badge.
- **access:** All students get the final office report and debrief notes.

Step 9: Learning Outcomes & KPIs

KPIS

level	metric	method	target
L1	Student reaction	Short survey	Mostly positive answers
L2	Project management knowledge	Pre and post quiz	Better post-quiz score
L3	Use in project work	Check next project plan	More balanced scope, resource, and quality notes

L4	Course project result	Compare final project management section	Better planning section than the first draft
----	-----------------------	--	--

Step 10: Risks & Support Team

TUSLER RISKS

id	category	prob	impact	mitigation	preventive	responsive
R-01	Tiger	High	High	Make timers adjustable for the class.	Test minigame speed before the lesson.	Slow the timer and give one example round.
R-02	Puppy	High	Low	Use clear labels for points and resources.	Show the resource meanings before play.	Explain Budget, Team, and Quality again during pause.
R-03	Alligator	Low	High	Prepare a backup activity if the game does not load.	Test the browser and projector before class.	Use paper department cards and discuss choices.
R-04	Kitten	Low	Low	Collect small spelling and balance issues after the session.	Do a quick peer review before submission.	Fix small issues in the next version.

SUPPORT TEAM

name	role
Instructor	Facilitator
Lab assistant	Technical support

FACILITATOR ROLE

The facilitator explains the rules, helps confused students, pauses if needed, and leads the final discussion.

Step 11: Wireframes & Cascade

DASHBOARD WIREFRAME

The dashboard shows the void office map, main points, Budget, Team, Quality, the current minigame, and the next department price.

ASSET WIREFRAME

Each department tile shows its name, price, resource effect, locked or built state, and a short project management meaning.

PORTFOLIO WIREFRAME

The report page shows built departments, resource levels, minigame results, the escape result, and a short reflection.

Step 12: Preview & Export

IN SCOPE (COMPASSION MODEL ANCHOR)

The project includes a void office map, fast minigames, main points, Budget, Team, Quality, department buying, and losePoints=0 for failed cases.

OUT OF SCOPE

The project does not include real company data, VR, real money, online multiplayer, or advanced simulation.

WHY (MOTIVATION)

Students may care more when their project choices make the office grow and move them closer to escaping the void.

HOW (ETHICS)

The game should use simple student IDs and avoid public ranking by real names.
